

Imagine working for a large tier-1 supplier in the exciting world of automobile manufacturing. If you enjoy working in a collaborative and respectful environment with great team members, this could be the opportunity for you. Futaba North America provides management support to its automotive parts production companies in North America. The Futaba Group leverages its core technologies such as stamping and welding to create value added products that are in line with the needs of consumers, deliver peace of mind, and promote environmental initiatives that contribute towards a sustainable society.

We are looking for a talented Quality Assurance Manager to establish and implement quality policies, procedures, and quality management systems that meet product quality objectives, customer commitments, and regulatory requirements. This headquarters role has three (3) direct reports and is located in Bloomingdale, IL. Major responsibilities are as follows:

- Manage the day-to-day operations of the Quality function.
- Establish and maintain quality assurance policies, standards, procedures, and internal controls to meet the intent of IATF 16949.
- Evaluate and recommend necessary inspection and test equipment required for all phases of production from incoming inspection through inspection of finished goods.
- Ensure completion of preventative maintenance and repairs of laboratory instrumentation.
- Plan, layout, and assign work. Hire, train, monitor, discipline, evaluate, and develop employees.
- Develop and implement various inspection and testing procedures. Establish and maintain quality control records including charts, statistical analyses, and reports.
- Reduce defects and prevent reoccurrence through root cause analysis and problem solving.
- Monitor employees' activities, provide technical assistance, and assist with determining causes for faulty work, failure to maintain quality, excessive scrap, or rejects.
- Implement counter measures to remediate quality variations.
- Develop job qualifications, performance standards, training standards, and SOPs.
- Enforce organizational policies, SOPs, GMPs, safety rules, and good housekeeping procedures.
- Provide quality training to department and plant employees.
- Develop annual Quality Improvement Plan and support Total Quality Improvement efforts.
- Interface with internal auditors, third party auditors, and regulatory agencies. Coordinate inspection and audit preparations and ensure implementation of corrective action plans.
- Interact with customers, investigate quality complaints, resolve issues, and communicate corrective and preventative action plans.
- Conduct and document annual Mock Recall. Ensure controls are in place to provide full traceability for components and finished product lot in the event of a supplier or customer product recall.
- Prepare and present reports on the status of Quality Audit programs to plant and corporate management.
- Develop and adhere to departmental budget. Control variances.
- Provide technical assistance to customers. Ensure customer requirements are met and customers are satisfied.
- Interface with Supply Chain, Production, Engineering, and across the organization to improve costs and efficiencies.
- Maintain communications with manager and quality team on progress, issues, delays, and other pertinent information.
- Develop technical manuals and maintain related project documents and files.
- Travel to our manufacturing facilities in North America and to customers' and suppliers' sites is required.
- Annual visits to Futaba Japan to meet with Futaba QA and Best Practices.
- Maintain professional currency in technical knowledge and relevant products, services, and marketplace developments.
- Comply with company policies and procedures and safety and housekeeping requirements.
- Performed other projects and duties as assigned.
