

Orochem Technologies Inc. has been manufacturing lab consumables for the pharmaceutical industry, clinical diagnostic labs, food industry, and other testing labs for 27 years. We are looking a production staff to join our team in Naperville, IL. Only local applicants will be considered. To apply, please email your resume to info@orochem.com

Responsibilities:

- Work on the production line and follow the instruction from supervisor
- Clean, setup and monitor production equipment
- Complete required daily checks and fill out paperwork
- Do basic in line quality checks
- Make adjustments as directed to ensure quality and production specs are being met
- Collect samples for QA analysis
- Manage floor space for raw materials and finished products
- Work with engineers and quality team to spec out requirements for an upcoming production run
- Follow all GMP policies and requirements
- Perform other duties as assigned
- Flexible working hours

Qualifications:

- 2 year technical degree (prefer)
- 3-5 years of manufacturing experience in column packing, soft gel encapsulation and packaging, general packaging/shipping and receiving.
- Experience working in a GMP environment making nutraceuticals, or chemical production
- Team player who can work with others to get things done.
- Someone who can take the initiative and get a job done with minimal supervision.
